

Remove Cached Auto Complete Contact

Remove Cached Auto Complete Contacts in Outlook Client

- [Step 1](#)
- [Step 2](#)
- [Step 3](#)
- [Step 4](#)

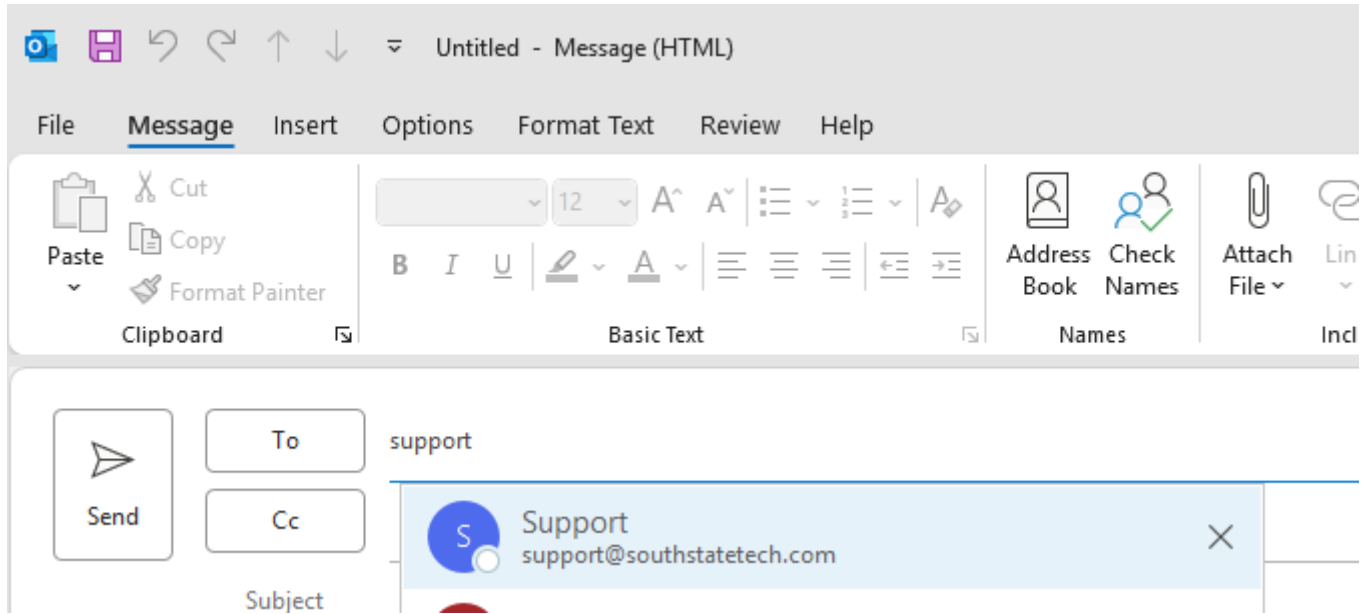

Step 1

Begin a New Email

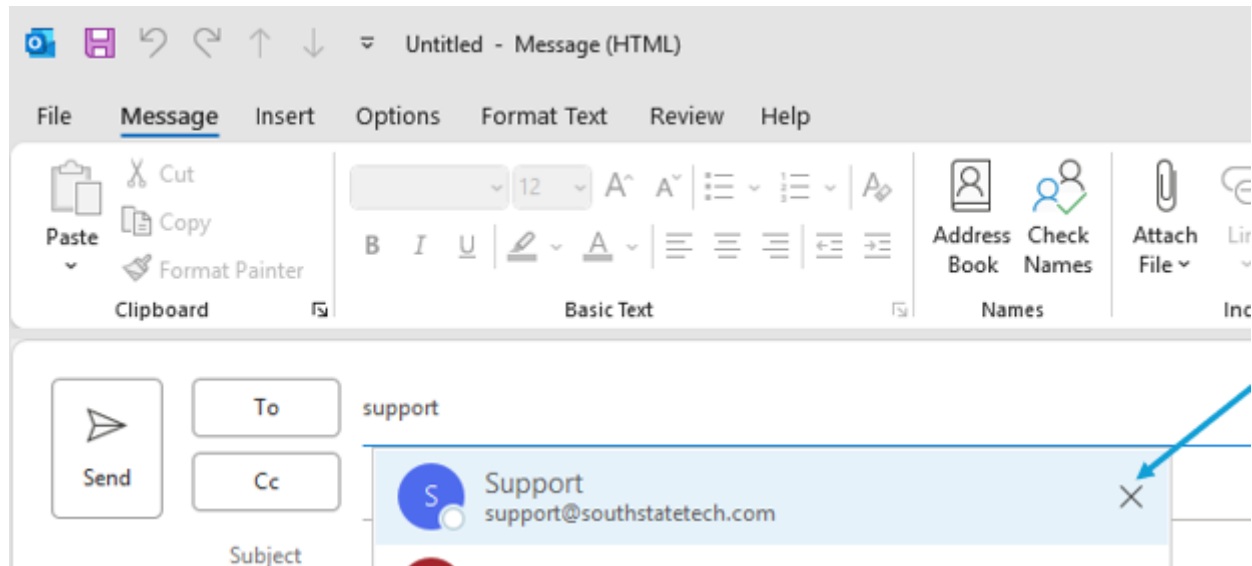

Step 2

Begin by typing some of the contacts name or email address so it auto populates

Step 3

Click the 'X' on the populated contact you need to remove

Step 4

The cached contact is now removed. You can continue to type the rest of the email. The quick cache will update and auto-populate the newly typed email address after a new email is successfully sent.
